

# OFFROAD AND 4X4 2018

[www.norgesdekk.no](http://www.norgesdekk.no)

# ARSENAL

**Arsenal** is our latest military inspired wheel with a modified tactical look. This innovative style combines the look of modern defense to bring an off-road character to the next level. The Arsenal exhibits a bolted face upon chiseled windows - a powerful look of force that is perfect for the adventure minded overland explorers. We set our sights to offer one of the most unique off road wheels from Black Rhino down to its unique center cap. This modern style really drills in the attitude of an indestructible, explosive-proof look to a whole new caliber. Our mission was to cover the best range of stock and lifted off highway vehicles, Arsenal offroad rims are available in 17x9.5, 18x9.5, 20x9.5 and 20x12 sizes. Offsets range from -44 to 12mm and five, six and 8-lug bolt patterns, including a 8/180 pattern for newer GMC and Chevrolet trucks.

# ARMORY

**Armory** is the brutal weapon of choice when your vehicle must absolutely be victorious in the next dangerous off road operation. Straight from a battlezone, this wheel is the right weapon of choice with its bolted face - a dramatic statement of power that is perfect for the regiment of adventure minded tuners. We set our sights to offer one of the most unique off road wheels from Black Rhino down to its unique center cap. This tactical style affirmatively radars an indestructible quality of explosive-proof looks to a whole new caliber. Our mission was to cover the best range of stock and lifted off highway vehicles, Armory off road rims are available in 17x9.5, 18x9.5, 20x9.5 and 20x12 sizes. Offsets range from -44 to 0mm and five, six and 8-lug bolt patterns, including a 8/180 pattern for newer GMC and Chevrolet trucks. These truck rims sport huge lips to provide safe bead seating for oversized tires.

# BARSTOV

The Black Rhino Barstow delivers a tough no-nonsense type of styling derived from a classic split five spoke design. The aftermarket rim features a deep step lip leading to a thick beadlock style ring that serves a purpose to protect the wheels valve stem. Even more rugged is the newly engineered Textured Rough Matte Black made to compliment durable bedliner coatings found on offroaders. Other finishes include a Textured Matte Black or Matte Bronze with Matte Black Lip Ring (etched Black Rhino Spoke Logo) for truck and SUV owners that want a complimenting color scheme. The Barstow is available in 17x9.5, 18x9.5, and 20x9.5 in multiple offsets across 5 and 6 lug PCD patterns to accommodate a wide range of vehicles.

# BOXER

The Black Rhino Boxer was designed by enthusiast and made for enthusiast of the Ford and Subaru off road rally racing genre. For the offroad overland Subaru vehicles such as Crosstrek XV, Legacy, Impreza, Forester, Outback, and WRX, the wheel is offered in 15x7 size weighing in at a mere 16lbs! That means the lightweight wheel weighs approximately 3.4lbs less than competitors resulting in improved performance, steering response, and gas mileage. The aftermarket rim also features a rally ring that serves to protect the valve stem while enhancing strength and prevents deformation of the wheel from outside forces. Other sizes available are 17x8 and 18x8 for vehicles such as, but not limited to BRZ, Fiesta ST, Focus ST, FRS, STI, and WRX. Available finishes include Gloss Gold and Matte Gun Black.

# DIAMANTE

**Diamante** is a hard-as-diamond design. It's a fresh take on the outer ring that shows a symmetrically brutal geometric style punching up the ruggedness factor. Ten pentagons leading the spokes are extruded within the wheel barrels lip, giving the Diamante a hard-geared mechanical toughness. To cover the full range of stock and lifted off highway vehicles, Diamante off road rims are available in 17x9, 18x9, and 20x9 sizes. Offsets range from -23mm to +12mm and five, six and 8-lug bolt patterns. These truck rims sport huge lips to provide safe bead seating for oversized tires. Diamante truck wheels are featured in special finish combination as innovative as the wheel design itself, including matte black body with a tinted machined face, and our new contrasting bronze bolts to top off that first impression for this state of the art design.

# HIGHLAND

The **Black Rhino Highland** is the spiritual successor to the Black Rhino Sidewinder off-road truck and SUV wheel. For years, the Sidewinder had dominated trucks with popularity with its distinct bowled multi-spoke design. The Highland takes this a step further by refining this popular style with broadened spokes met with CNC machined edges that latch onto the edge with a bold hex bolt. The Black Rhino logo is proudly carved into the wheel edge as well, and the wheel is updated with a new sleek center cap for 2018. The Highland comes in 17x9.5, 18x9.5, and 20x9.5 with ET12, ET0, and ET-12 offsets. The aftermarket wheel comes in 5-lug and 6-lug PCD's available in a Matte Black with CNC machined surfaces and Silver bolts

# MADNESS

**Black Rhino's Madness** off-road rims feature an eye-catching "wheel within a wheel" design, made possible by the juxtaposition of the dark-tint machined face with the matte black outer lip. It's an innovative new look that sets Madness apart from typical truck wheels. The swept-back slots in the outer lip give Madness a unique kinetic quality.

Madness off-road wheels are made specifically for stock and lifted trucks with that off-highway vibe and are engineered to support the heavy loads associated with such vehicles. Massive lips provide a safe bead seating for even the most aggressive tires. Wheel offsets range from -12mm to +12mm and these truck rims are available in 17x9, 18x9 and 20x9 sizes with 5, 6 and 8-lug bolt patterns to fit a wide range of makes and models.

# MOZAMBIQUE

**MOZAMBIQUE** truck wheels by Black Rhino. The Mozambique wheel by Black Rhino is a concave Rotary Forged style wheel designed for trucks. The Mozambique is designed with seven thick spokes which concave deep into the center of the wheel, bringing out what most call an aggressive look. This wheel is available in three finishes: full matte black, gloss black with milled spokes and silver and mirror cut face. The available fitments for the Mozambique are: 5x114.3, 5x120, 5x127, 5x139.7, 5x150, 6x114.3, 6x135, and 6x139.7 with available sizes in: 18 inches, 20 inches, 22 inches, and 24 inches. Black Rhino provides hub centric rings for the Mozambique wheel, according to the corresponding vehicle. Each Black Rhino wheel is engineered to carry the heavy loads often associated with Trucks and SUV's.

\* The Mozambique Rotary Forged® Wheel is manufactured using a highly advanced production technique called Rotary Forging. The rim of the wheels is forged at high pressure while the wheel is spun at high speed. This alters the molecular structure and enhances the strength of the alloy. The benefit is a much lighter weight than a regular cast wheel. Most importantly, the weight saving is in the outer rim of the wheel which dramatically reduces rotational mass and enhances vehicle performance.

# OVERLAND

**Overland** embodies BlackRhino style with its multi layered mechanical features that strongly tie lip with its concavity that constructs into an ultra rugged looking custom wheel. It's a fresh take on the split five spoke design that is integrated with its outer bolted lip- showcasing both intricate ruggedness and precision style that define this brand. The hallowed five tongued forks are individually recessed in the right areas to give many dimensions that suit the most demanding styles of trucks. The Overland has unique dimensionality with these details combined with aggressive concave for the wider sizes. To cover the full range of stock and lifted off highway vehicles, Overland offroad rims are available in 17X8 , 17x9.5 ,18X8, 18x9.5, and 20x9.5 sizes. Offsets range from -18mm to+52mm for five, and six lug bolt patterns. These truck rims sport huge lips to provide safe bead seating for oversized tires. Overland truck wheels are featured in the classic stealth matte black.

# PINTABO

Black Rhino introduces the new explosive Pinatubo wheel suitably named after one of the world's most eruptive volcanoes found on the Philippine islands. Eight beefy spokes explode from a deep center and crawls towards a brawny lip resulting in a massive crater like appearance. It is our deepest and most concave wheel to date! Along each spoke are deep trenches tactfully cut by CNC machining to set off the bold Gloss Black finish. The machining continues the the sidewalls of each spoke and is tastefully added to the edge of the lip. Sizes include 17x9.5, 18x9.5, 20x9.5, 20x12, and 22x12 available in 5, 6, and 8 lug PCD patterns.

# PISMO

**Pismo** is sure to be a big hit with off highway tuners. It's one of the newest custom off road wheels from Black Rhino, a fresh new design that unique combines a sophisticated kind of ruggedness and style with its brightly contrasted milling within its split seven windows. This gives the Pismo a stunning first impression up to its outer lip edge that sports a geometrically pleasing inset that echoes nicely with a set of your favorite rugged tires. To cover the full range of stock and lifted off highway vehicles, Pismo off road rims are available in 17x9.5, 18x9.5, 20x9.5 ,20x12, and 22X12 sizes. Offsets range from -44mm to +6mm for five, and six bolt patterns. Pismo truck wheels are featured in one finish as sophisticated as the wheel design itself, including gloss black with precision milled spokes to accentuate the designs classic style.

# PANDORA

**PONDORA** truck wheels by Black Rhino. The Pondora is a straight cut six spoke with a small step groove accenting each spoke. Each spoke moves with prowess to meet with a nice machine cut lip. Much like the luxurious wild gaming park Pondoro in South Africa, after which the wheel is named, the PONDORA fits the bill of classy with a touch of raw toughness. Built for Trucks and SUV's and available in 20",22",24" in Gloss Black with Machine Cut Lip, Silver with Machine Cut Face & Lip, Chrome. Each Black Rhino wheel is engineered to carry the heavy loads often associated with Trucks and SUV's. All wheels are either hub-centric or supplied with centering rings to ensure a smooth vibration free ride. PONDORA truck wheels by Black Rhino.

# PEAK

**PEAK** truck wheels by Black Rhino. The PEAK is a sleek six spoke with smooth accent lines in the center of each spoke. To add to the look each spoke rolls back with a nice concave to give that sporty feel. When you are looking at the top, reach for the PEAK for your Truck and SUV. Available in 20",22" in Matte Black or Gloss Black with a Mirror Cut Face. Each Black Rhino wheel is engineered to carry the heavy loads often associated with Trucks and SUV's. All wheels are either hub-centric or supplied with centering rings to ensure a smooth vibration free ride. PEAK truck wheels by Black Rhino.

\* The Peak Rotary Forged® Wheel is manufactured using a highly advanced production technique called Rotary Forging. The rim of the wheels is forged at high pressure while the wheel is spun at high speed. This alters the molecular structure and enhances the strength of the alloy. The benefit is a much lighter weight than a regular cast wheel. Most importantly, the weight saving is in the outer rim of the wheel which dramatically reduces rotational mass and enhances vehicle performance.

# PREDATOR

**Predator** is a sleek new mesh you did not see coming. It's a blend of the newest off road wheel style and aesthetic for Black Rhino packaged into dramatic size fitments that are aggressively wide. The Predators eight split spokes sneak up on you to assemble together in a radially engaging center that screams both performance and ruggedness. Each of the windows are finely recessed in the design with precision, giving Predator unique dimensionality to its face and compliments the wide barrel dish. To cover the full range of stock and lifted off highway vehicles, Predator off road rims are available in aggressive 20x12, 22x12, and 24x14 wide sizes. Offsets range from -76mm to -44mm and five, six and 8-lug bolt patterns, including a 8/180 pattern for newer GMC and Chevrolet trucks. These truck rims sport huge lips to provide safe bead seating for oversized tires. Predator truck wheels are featured in five new finishes as innovative as the wheel design itself, including gloss gunmetal with a bright machined face, matte black, matte black with a bright machined face, matte black with a dark tint machined face and gloss black with a machined bright machined face.

# ROTORUA

The Black Rhino Rotorua is built with maximum concave and aggressive stance in mind. Named after a northern city in New Zealand, the wheel draws inspiration from the island's unique truck culture. A race influenced multispoke aesthetic is broadened up and sharpened to fit the tough lines of UTE vehicles such as the Ford Ranger, Holden Colorado, Isuzu D-Max, Nissan Navara, and Toyota Hilux. Rotorua is built around vehicle specific brakes to offer maximum concavity and is also offered with different center cap options to accommodate protruding vehicle hubs. The aftermarket rim is available in 20x9.5, 18x9.5, and 17x9.5 in high and low offsets.

# ROKU

The Black Rhino Roku is inspired from a classic race wheel epitomized by nostalgic tuners of the millennial generation. These nostalgic race times have now passed and are now evolving into the offroad overland truck and SUV culture. The Black Rhino Roku was made to bridge the gap of the evolving aftermarket trends to bring this once popularized compact race car look to the now tough, brawny, and bold world of trucks and SUVs. This lightweight off road rim is bulked up and modernized with smooth chamfers and a concave profile to complement any on or off road truck build. The Roku is available in a Matte Gun Black and Matte Bronze Metallic. Sizes include 20x9.5, 18x9.5, and 17x9.5, available in multiple offsets and 5 / 6 lug PCDs.

# SELKIRK

What happens when you combine a feisty off-road attitude with a hardened aluminum alloy, multi-piece construction and stunning design details? You get Black Rhino's new Selkirk model off-road wheels. Selkirk wheels, with their ten brawny spokes and beefy center cap, in a gloss black finish with bright milled edge detail, punctuated by oversized hex bolts at the lip edge, just exudes a lifted truck temperament. Our manufacturing expertise enables us to combine a one-piece cast spoke and hub array fusion welded to a lightweight forged our barrel, the best of two worlds.

Selkirk off-road rims are available 17x9, 18x9, 20x9 and 20x10 sizes, with a wide range of offsets to help you achieve the wide off-road footprint you're after

# SHRAPNEL

The Black Rhino Shrapnel is an explosion of precise CNC machining inspired from modern warfare design. Influenced by high tech military groups, the aftermarket rim takes bold, rugged army action onto on or off-road SUV and trucks. The wheel features deep concave design with a robust lip equipped with powerful and secure bolts. An all original wheel face can neither be described as a five spoke or a mesh, but rather a new combustion to make your vehicle really stand out from the crowd. Black Rhino aftermarket alloy wheels meet and exceed OEM standards for strength fatigue and safety. Shrapnel wheels include precise hub clearances for PCD's in both 5-lug and 6-lug. The Shrapnel is available exclusively in Gloss Black with CNC milling and Silver Bolts.

# SIERRA

**Sierra** Off Road Styled Wheels by Black Rhino. The Sierra is a thick & aggressive multi-spoke style. The SIERRA takes its name from the vast mountain range spanning the California, and Nevada border. Each spoke on the SIERRA emulates the peaks and valleys of the rugged granite mountains. Like its name SIERRA; which also translates to “saw” in Spanish, each spoke has a tough hard cut milled section that wraps the inner part of each spoke. Available in 17x9”, 18x9”, 20x9” & 20x10”, with offsets ranging from +12mm, 00mm, -12mm, -25mm. There is a variety of fitments available in 5x127, 5x139.7, 5x150, 6x135, 6x139.7, 8x165, 8x170. The SIERRA is available in a Gloss Black w/ Milled Spokes. Each Black Rhino wheel is engineered to carry the heavy loads often associated with Trucks and SUV’s. All wheels are either hub-centric or supplied with centering rings to ensure a smooth vibration free ride. Sierra off road wheels by Black Rhino.

# SPEAR

Tricked out sport trucks and SUVs can take things a whole step higher with the addition of a set of new Black Rhino Spear model truck rims. These hardened light alloy truck wheels make a “big” difference in vehicle appearance since available sizes include 20x9, 22x9.5 and a gargantuan 24x10 inches. Both 5 and 6-lug bolt patterns ensure a proper fitment with a wide range of trucks and SUVs, including new Jeep Cherokee and Dodge Durango and the new Nissan Navara. Like all Black Rhino wheels, the Spear model is engineered to handle the heavy loads associated with the city truck market.

Spear wheels go big on design, too. The 15-spoke array is clean and uncluttered at rest, and becomes a scintillating masterpiece once it gets rolling. The finishes are as special as the design—silver with a mirror cut lip edge, matte black and mate black with a matte machined lip edge.

## TANAY

**Tanay** model truck rims are focused on a new, fast emerging segment, the crossover utility vehicle, or CUV. Whether yours is a Juke, Renegade, Crosstrek, HR-V, Trax or even newer, upgrading to muscular 18x8 Tanay hardened light alloys will really set your ride apart. These are serious truck wheels, with six beefy paired spokes, a deep set center hub with an aggressive center cap and a lip accented with bright aircraft-type fasteners. The highly exclusive finish, combining a matte black barrel with a bronze tint spoke array, sets off the design perfectly. Tanay wheels are available in both 5 and 6-lug bolt patterns, for a precision fit on a wide range of CUVs, including the new Chevrolet Colorado and GMC Canyon, the new VW Amarok and the Mercedes Sprinter, too. Like all Black Rhino wheels, they are engineered for strength, durability and long-lasting good looks.

# WARLORD

The Black Rhino Warlord truck rims live up to that aggressive name in more ways than one. Start with the eight brawny spokes, bifurcated as they reach the thick, detailed lip. It's a beefy, take-no-prisoners design, entirely in keeping with the spirit of stock and lifted trucks prepped for off highway gambols. Warload off-road wheels are aggressively sized, too, from 17x8, 17x9, 18x8, 18x9, 20x9 and up to 22x10, all with oversized lips to provide a sturdy bead seat for the big fat tires offroaders prefer. Warlord truck wheels are available in 5, 6 and 8-lug bolt patterns, including 5x110, 5x114, 6x120, 5x120 for the VW Amarok and the newer 6x130 pattern for Chevy Colorado, GMC Canyon and 8x180 for bigger GMC trucks. Offsets range from -23mm to +12mm. Versions are also available for Sprinter vans and CUVs.

Warlord wheels are available in a striking matte gunmetal finish and in matte black with a machined dark-tint lip. Like all Black Rhino wheels, Warlord off-road rims are engineered for strength, durability and long-lasting good looks.

# YORK

**York** is a one of a kind six spoke new from Black Rhino. It's utilizing a fresh new style that shows a performance oriented nature, combined with an undeniable tough precision constructed look that shows both rugged character with sporty style. Six rubbed spokes create raised triangles that point towards the center combined with its outer lip gives the York a unique hybrid personality of speed and toughness. The cut-through lip pattern adds a nice texture reminiscent of the hollowed out features common in race bred machines. To cover the full range of stock and lifted off highway vehicles, York off road rims are available in 17X8, 17x9, 18X8, 18x9, and 20x9 sizes. Offsets range from -12mm to+52mm for five and six lug bolt patterns. York truck wheels are featured in two finishes that show the wheel off, including a stealthy matte black and a sporty matte gunmetal.

# ZULU

**Zulu** is a warrior of a wheel. It's one of the newest off road wheels from Black Rhino, a fresh new stylish mesh for your street style sport utility vehicle. Twelve angled twin mirrored forked spokes give Zulu an imposing first impression of precision dimensionality. To cover the full range of stock and lifted off highway vehicles, Zulu off road rims are available for a six lug bolt pattern in 20X9.5, 22X10, and 24X10 sizes. Offsets range from +15mm to +30 and five, and six bolt patterns.

Zulu truck wheels are featured in two new finishes as innovative as the wheel design itself, including matte black and matte black with a dark tint machined face.

Sizes  
20x9.5  
22x10  
24x10

Bolt Patterns  
6x135 | 6x139.7
